Build on Blockchain and IoT, powered by you, Carbonian!

CARBON, the most environmentally sustainable crypto on earth

View Video

Brochure

TBD

Carbonian

A Carbonian is a person who supports the carbon token. Carbonians believe that they can help heal the earth by actively participating in methods to combat climate change. These methods include renewable energy, agriculture, food waste, forestry projects and much more. Carbonians will help bring forward innovative solutions for the earth and become leaders in the efforts to combat climate change.

I Am A Carbonian, Are You?

➡ Become Project Owner

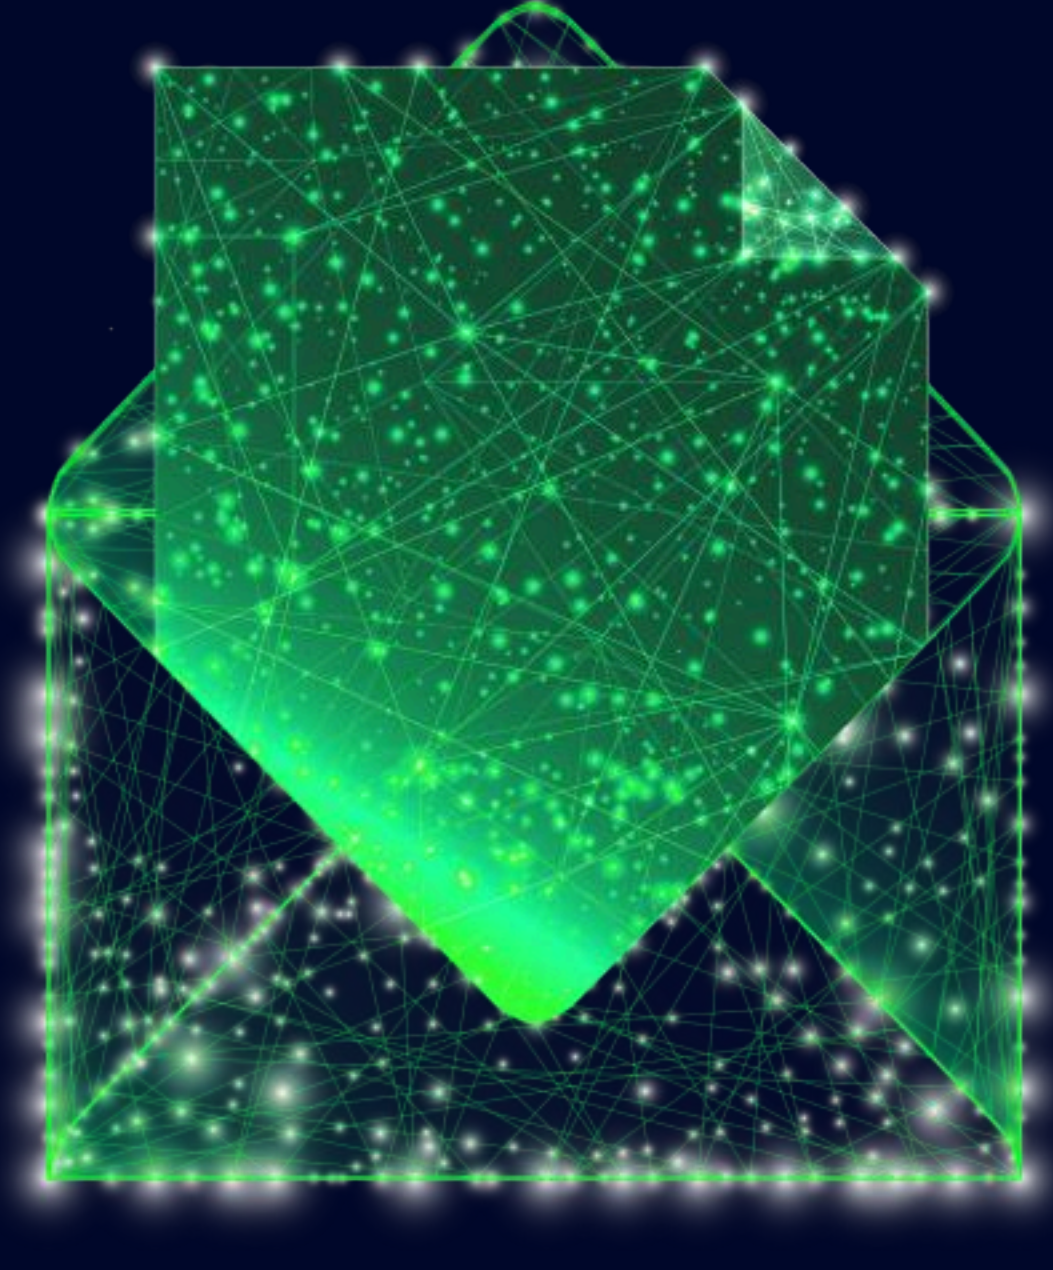

➡ Become Participant & Carbon Offset

Carbon token

Carbon token is the ultimate digital asset used by Carbonians. It is the most environmentally sustainable crypto on earth, supported by individuals and institutional impact investors

Carbon token is generated by using Blockchain/Crypto Technology, empowered by IoT, and uses robust processes which are designed with Six Sigma methodology.

Please read our [Green Paper](#) to know more about Carbon token.

CEO letter

Let us read our CEO letter to all carbonian, what drives him, what's the story behind, what's the plan, and what he expect from us.....

[See more](#)

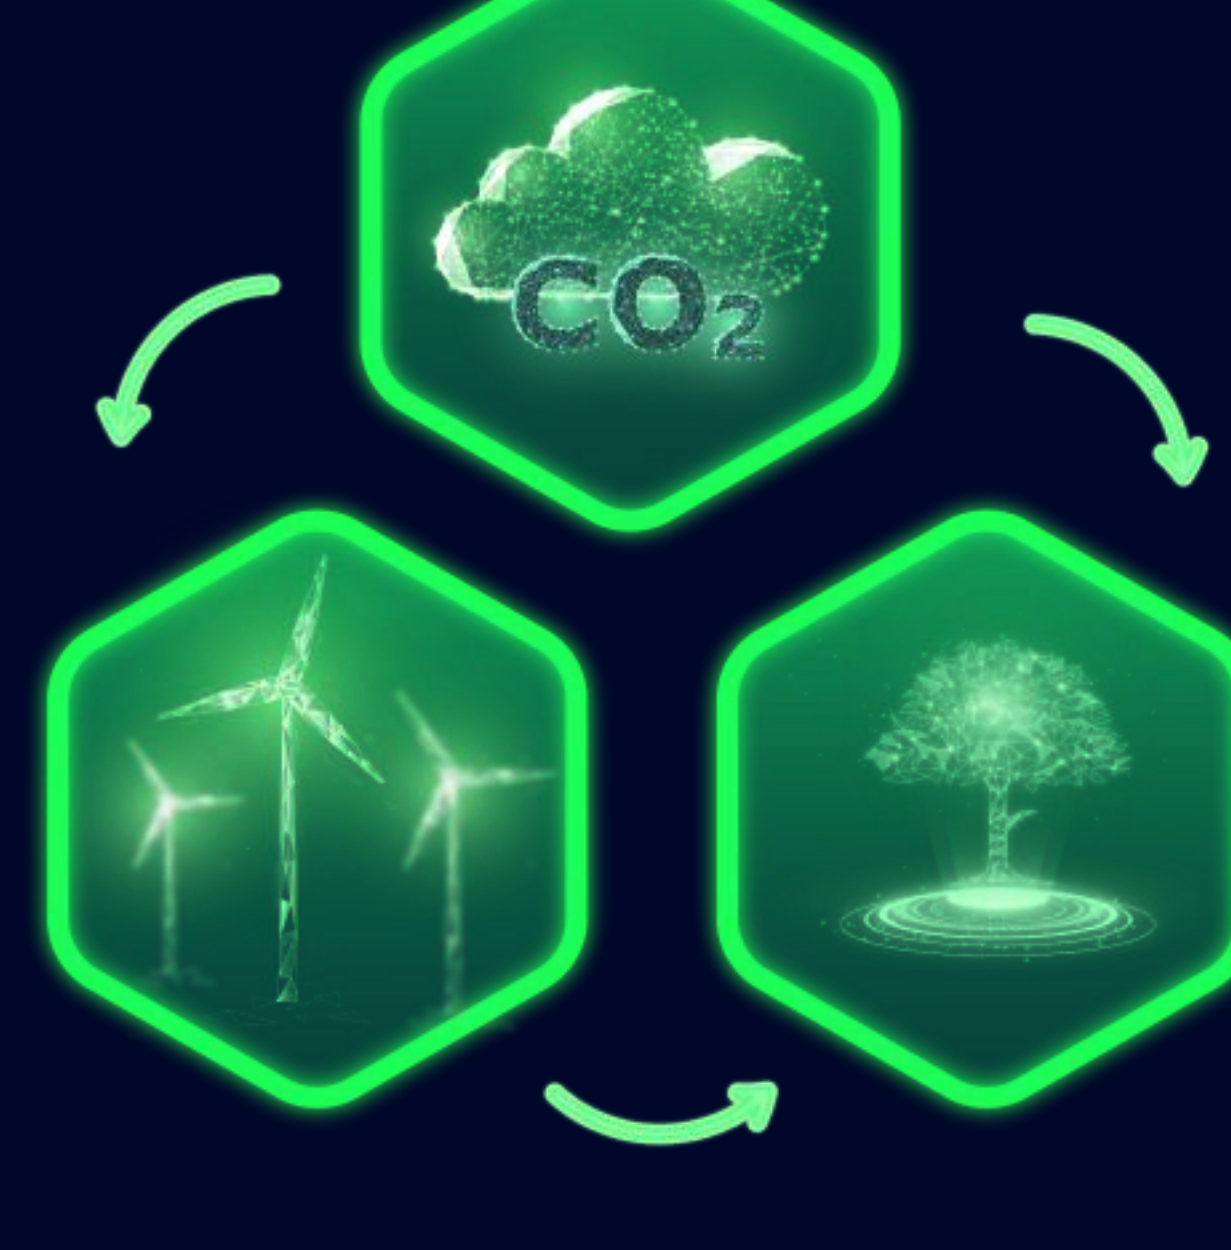

Carbon credit

1 token of CARBON = offsetting 1 ton of CO₂ footprint

✔ Carbon credit is a tradable digital certificate that provides the holder (Carbonian) the right to emit one ton of CO₂ (or other GHG equivalent).

✿ One carbon credit by universal standard represents one ton of carbon captured or not released.

🏠 Carbonian who are acquire or retiring one carbon credit, you are the true environmental hero who has offset one ton of carbon emissions.

Combating climate change projects

Projects about renewable energy, energy saving, heat recovery, industrial processing, food processing/ waste, agriculture, forestry, other land use, etc. are types of combating climate change projects.

Currently we have **0,000** of projects participate in Carbon Token, which generate **000,000,000** tonnes of CO₂ emission reduction, which equal to reducing emission from **00,000,000** of cars using fossil fuel taken out from the road. Up to today, we already offset of **00,000,000** CO₂ emission by selected individuals and companies. For more details, please explore our Project Database and Carbon Offset Database below.
